Technical & Fundamental Analysis-Tools

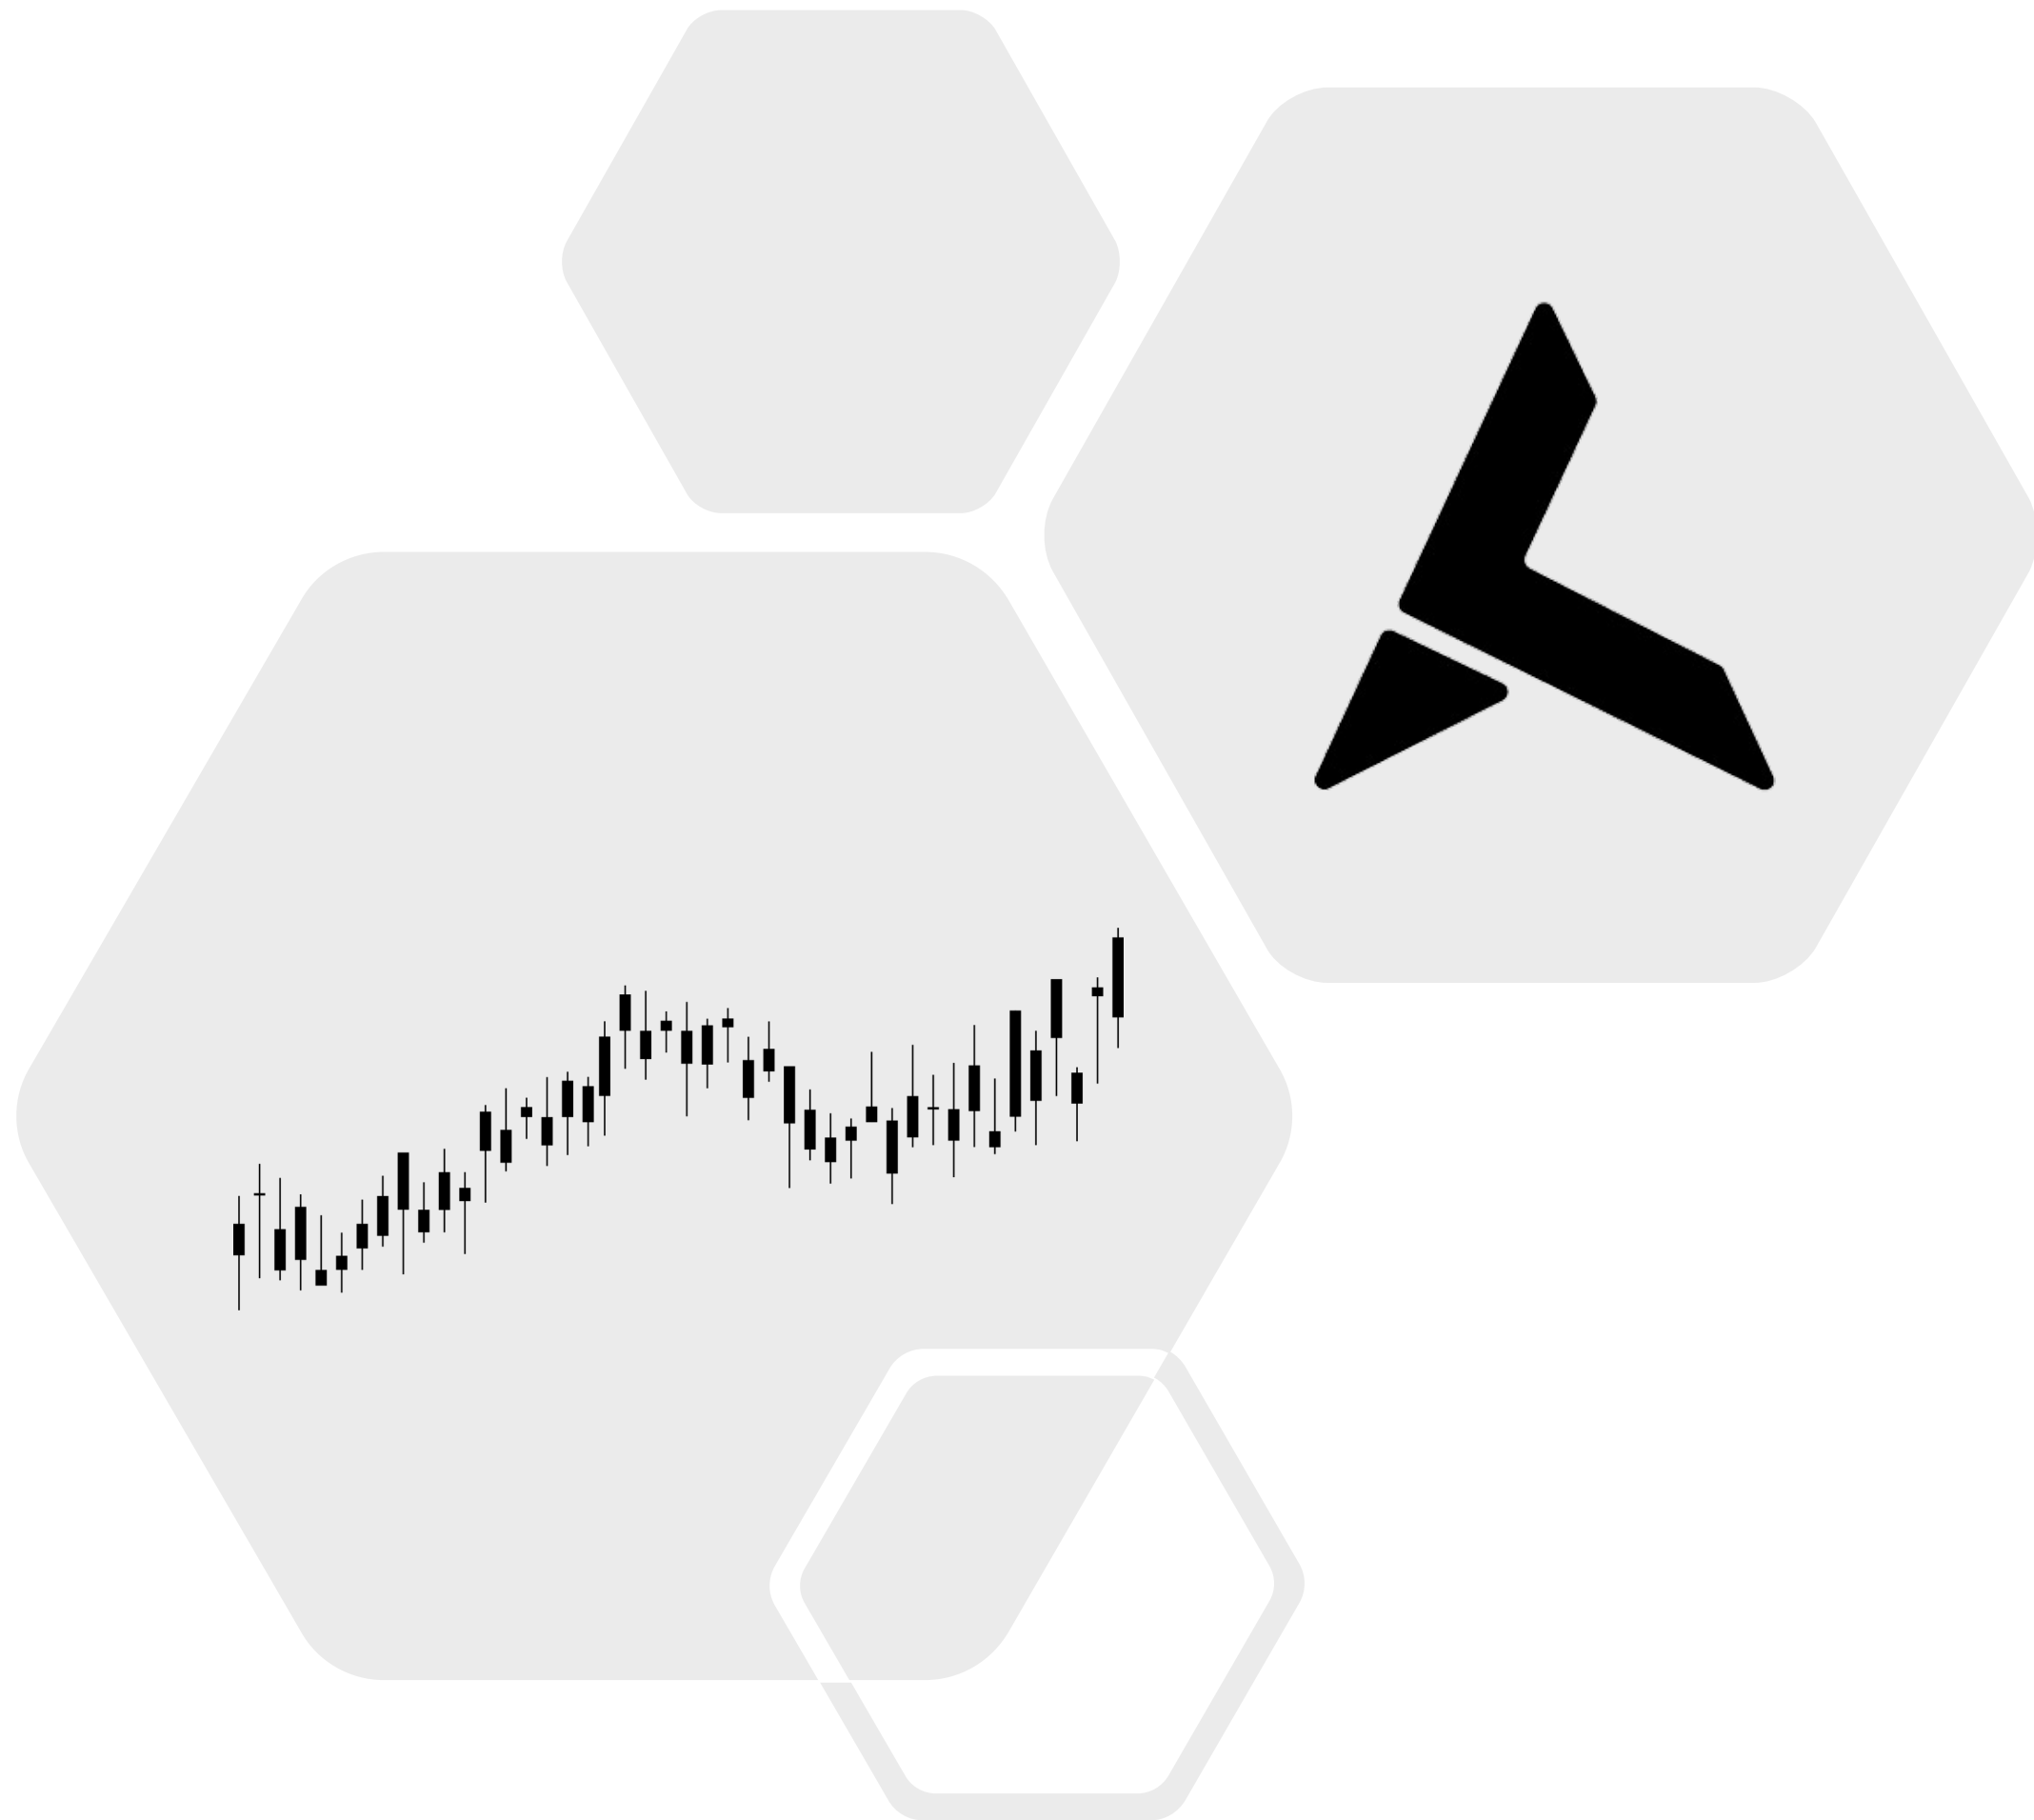

- Technical analysis is the study of price movement patterns. It is based on the idea that price and volume trends can be analyzed to predict future price movement. Technical analysis uses various tools and indicators to identify trends and patterns in the market. It is often used by traders to make short-term trading decisions.
- Fundamental analysis is the study of economic, financial, and other factors that can affect the value of a security. It is based on the idea that the value of a security is determined by its underlying fundamentals. Fundamental analysis uses various tools and indicators to identify factors that can affect the value of a security. It is often used by investors to make long-term investment decisions.

如何選擇合適的指標 & 策略

- 選擇一個指標時，要考慮該指標的歷史表現，以及該指標的理論基礎，以及該指標的適用性，以及該指標的易用性。
- 選擇一個策略時，要考慮該策略的歷史表現，以及該策略的理論基礎，以及該策略的適用性，以及該策略的易用性。
- 選擇一個策略時，要考慮該策略的歷史表現，以及該策略的理論基礎，以及該策略的適用性，以及該策略的易用性。
